PGY1 PHARMACY RESIDENCY

Pucci's Pharmacy offers a PGY1 residency with an extensive ambulatory and patient care focus.

Program Overview

Based in Sacramento, Pucci's PGY1 residency serves diverse and underserved communities through community pharmacy, ambulatory care, long-term care, and non-sterile compounding. Clinical services include HIV prevention and care, STI testing and treatment, contraception, travel health, tobacco cessation, immunizations, long-acting injection administration, MTM, and more. Training integrates evidence-based patient care, public health, and pharmacy operations. Mentorship, quality improvement, teaching, and association engagement develop pharmacist leaders who expand access to care, improve medication adherence and safety, and support disease prevention and management.

Program Highlights

Provide hands-on clinical care

Conduct patient visits, support therapy initiation and continuation, administer vaccines and long-acting injections, and document monitoring and follow-up.

Work with an integrated care team

Provide independent pharmacist care under the standard of care, supported by a phlebotomist, PrEP navigator, and a physician collaborative practice agreement.

Build and advance patient care services

Help develop clinical workflows, improve medication access, and evaluate patient outcomes to strengthen pharmacist-provided care.

Clinical Care at Pucci's

- Assess medical history, medication use, risk factors, and relevant laboratory results.
- Individualize treatment through clinical reasoning and shared decision-making.
- Monitor safety, response, adherence, and access; document care and coordinate next steps.
